

Siggy's Experience

Hello my name is Siggy Link and I would like to share with you my experience with Vet-Tox and my dog Teddy. Teddy is a 12 year old Pomeranian cross that was diagnosed with Leukemia, Pancreatitis and a tumor in her mouth in October 2008. Being 12 years old Teddy was considered too old to survive treatment and the veterinarian suggested that we take her home and make her comfortable as she was likely to pass within 3-4 weeks. Soon after the vet diagnosis a close friend of mine introduced me to Vet-Tox and insisted that we try it with Teddy. The difference in Teddy's appearance alone is astonishing her fur has completely grown back and her color has returned. Teddy's energy levels have also increased dramatically with many people commenting that she seems like a much younger dog. The tumor in Teddy's mouth is almost gone and we are confident of full recovery. Thank you very much for your help.

Siggy Link and family - Warrandyte Victoria

Kev's Experience

In May of 2008 I was diagnosed with testicular cancer, and told that it had spread into my lymph nodes. I had a large mass in the right hand side of my stomach which protruded and was easily visible. At the same time I seemed to be having a reoccurrence of a cancer in my bottom lip, which I had previously had surgery for a number of years ago. My doctor told me I would have to have chemotherapy and that if that treatment didn't work then I would have to have surgery. The idea of surgery was to remove one of my testicles along with the large mass in my stomach.

I was constantly tired, in pain, had diminished sexual desire and performance, and could not work anywhere near my full capacity. Luckily the company I worked for were very understanding and good to me. Having lost my father, uncles, other family members and some friends to cancer, and having seen what they had gone through, I didn't want the same fate. I began my treatments of chemotherapy, and completed my last treatment on 3rd. July, 2008. I could not keep down food, had kidney infections, and was in so much pain that I was unable to walk up my steps at home. I had to crawl. There were frequent trips to the doctor and the hospital, as well as being admitted to hospital a couple of times. I had lost an awful lot of weight and was simply wasting away.

Then about mid July, a very good friend of mine (for a number of years), told me about a natural product she had come across that she thought might help me, and suggested I give it a try. She was talking about zeolite. Well I was unsure, and I wanted to check with my specialist first to get his opinion. The specialist's office rang me to postpone the appointment twice, so by the time I got to see him it was late October 2008. Although the kidney infections had seemed to clear up, I still had pain in my testicle and stomach, and the lumps were still there, as was my lip still the same. Still tired and still very thin, I was told I would probably be looking at surgery, and probably by mid December. On November 3rd. I went to see my old friend Gail, who by the way was still on a weekly basis, talking to me about zeolite.

That day I started on Zeolite, Oxy Rich, Colloidal Minerals, Co-Enzymes and Spirulina. After the first week I had a lot more energy, the second week my whole general health felt a lot better than it had in a long time. By the third week my muscle tone started to improve, and I also think this was due to the fact that I was able to work harder than I had in quite some time. The fourth week I started putting on weight again, and by the end of the fifth week the young fellas at work said they couldn't keep up with me. To top it off I had NO pain and the lumps were gone by the end of the 6th. Week. My sex drive and performance is definitely back. I feel healthier, more energetic and stronger than I have in a long time. I consider myself very fortunate; Gail has remained my friend all these years and not once gave up on trying to help me. Kev. C

Gail's Experience

Hello and welcome to Natural Elements Group for Life Queensland. My name is Gail Clarke and I'd like to share with you some of the results my daughter, son and I have had with Zeolite. After learning about Zeolite there was never a doubt in my mind that Zeolite could be of benefit to my family's health. Then in mid July after a conversation with a mutual friend, I was introduced to Roger.

My children and I all started taking Zeolite right in the middle of a very bad dose of the flu. Three days of swollen glands, not being able to eat, swallow, breathe or talk and feeling like death warmed up. We've all had the flu like this at some stage, so I'm sure you all know what I mean. After 24 hours on Zeolite, my glands had gone down, and I could talk again. Within 2 days the three of us were so much improved, I couldn't believe it. It was the quickest recovery from the flu we'd ever had, while everyone else around us seemed to have that dreaded flu for 3 weeks.

I knew I was on to something. We continued to take our daily dose, and after the first week, we all noticed an increase in energy. After the third week I noticed spider veins had faded. My daughter's acne had all cleared up, which pleased her as we had already tried a number of different things before, none of which had worked. For 3 years my daughter had suffered from endometriosis, with frequent visits to the doctor, trips to the hospital, pain killers, ultrasounds, and even surgery. Yet often she would be doubled up in pain, unable to get out of bed, and unable to go to work. After 3 weeks of taking Zeolite all her symptoms seemed to disappear and she has not had a recurrence since July 2008.

My youngest son has worn reading glasses since he was in primary school, and also suffered from almost daily headaches, yet after a few weeks of taking Zeolite he no longer needs his glasses nor does he suffer with his constant headaches. I too have noticed a difference in my vision, whereas before I had to wear glasses for driving at night because my night vision was not the best. My night vision improved so much; I no longer need to wear my glasses for driving.

Early in 2007 I was diagnosed with fibromyalgia, and a second opinion confirmed the diagnosis. Those of you that may have fibromyalgia will know what I'm talking about. For those of you who don't, it is an extremely painful debilitating condition, restricting movement, ordinary day to day tasks, and certainly diminishes the quality of one's life, requiring medication to be able to function on any sort of normal level. Having always been an active, and health conscious person, fibromyalgia really went against my grain.

However, the good news for me is that since I've been on the Zeolite, the condition that I had has improved remarkably and I am once again able to function on a much more normal level without medications. Previously to July 2008, we all suffered from asthma, hay fever and allergies. Since July 2008, not one of us have suffered with any of these previous problems. I have a few friends who would like to share their stories too, so keep a watch out for future installments. You might be able to relate to some of their stories.

Please note: Vet-Tox has much improved since the beginning and is now named Zeo Pet and Vet.

ZeoONE has also been re-formulated is now much more effective too.
