

Health Authorities estimate that "over 80% of all Chronic Disease can be attributed to Environmental Pollution" WHO 1974 ...this is for people. BUT WHAT ABOUT OUR PETS ??

# Zeolite Pure Natural Mineral Powder

## Mined in Australia

Several good reasons why YOU should purchase your Pure Zeolite Powder from my store :

- 1) Getting your animals healthy does not mean you have to pay a fortune !
- 2) Remove the toxins that are making your animals sick.
- 3) This is an Australian Pure Mined Zeolite with NO added ingredients !
- 4) Zeolite ***can Improve Your Horse's & other Animals Health + Your Wallet too .***
- 5) Zeolite can also be applied topically for great results as a poultice.

**Do your own research, find out the amazing benefits of Zeolite !**

**Overseas trials show there are many benefits to be had by feeding Zeolite to Horses as a supplement, such as the following :**

- . scavenges free ammonia molecules in the gut and in manure
  - . improves nutrient digestion
    - . increases rate of gain
- . improves feed conversion ratio - less feed per pound of gain
  - . reduces acidosis
  - . reduces scours
  - . reduces cribbing
- . improves bone and tendon growth
  - . improves colour of coat
- . controls noxious odours from within thus improving the environment for animals as well as humans
  - . improves animal health
- . pH 7.4 which is good pH for the gut health

**Many similar benefits can be achieved for all other animals too.**

# **This is Australian Pure Mined Zeolite with NO added ingredients**

## **CLIENT INFORMATION RECEIVED SO FAR.**

### **Case # 1 :**

*A thoroughbred mare on Zeolite Powder for 3 months ( in her food) , is no longer windsucking. This is after 10 years of the habit (with her current owner)! Possibly longer. The Mare also has more depth of colour and softness to her coat this season, although a subtle change ,it is still noticable by her owner.*

*Only changes made this season has been to implement Zeolite to the Mares food program.*

### **Note:**

*Zeolite removes toxins.Toxins cause behavioral problems .Wind sucking is a behavioral problem which produces "endorphins"..which make your horse feel better.Take away the cause (toxins?) and your horse may no longer want do it !*

### **Case # 2**

*A rescued gelding , very difficult to handle. Bites, has a nasty disposition and appears to be constantly angry.Within 4 weeks of Zeolite supplement in his food daily, he is much happier , actually coming towards people instead of always walking away. No longer biting and appears much calmer. Bad mood/attitude is also symptomatic of toxins in a lot of cases.*

### **Case # 3**

*Old sheepdog ( about 9yrs old) given a new home. He was a very angry old dog. Ripped his new couch to shreds in 2 weeks, barked a lot at nothing, snapped and attempted to bite on several occasions for no reason at all. Started feeding Zeolite Powder to him once a day in his evening meal.3 weeks later it was as if someone had turned off the "nastiness" and he started being happy, no more attacking his "once new" couch, no more attempting to bite.Just a completely different old dog .He actually smiles these day ! His coat has also softened noticeably and gained more depth of colour.The latest improvements noticed is he no longer hops on his back legs ,( he appeared to be injured in that region & was very wasted there , no muscles or bulk at all) is walking normally and appears to be building up the rear end.*

**More testimonials coming...watch this page !**

# Some symptoms & conditions that can be linked to Environmental Toxicity:

- Allergies
- Aggression
- Ear problems
  - Anemia
  - Arthritis
- Behavioral Disorders (very common)
  - Bladder infections
    - Cancers
    - Colic
  - Dermatitis
  - Eye Problems
  - Hoof Problems
  - Infections
  - Infertility
  - Obesity
- Pancreatic Dysrunction
  - Proud Flesh
- Respiratory Problems
- Skin Problems
- Stall/Stable Vices
- Thyroid problem
  - Laminitis
- Liver problems
  - Melanomas
    - Bloat
    - Ulcers
- Viral Infections
- Wound Healing, etc ,etc

Killer Diseases are hitting our Animals.

Why ?

Some Scientists concur that most animal cancers are caused by exposure to carcinogens encountered in the environment. These include air pollutants, chemical toxins, chemically fertilized & sprayed grazing paddocks, carcinogens in the diet, toxic agents in drinking water, drugs , chemical wormers ,vaccines, etc.
